Long term Plan 2020/21 PSYCHOLOGY

2021/22	Autumn 1a weeks	Autumn 1b weeks	Spring 1a weeks	Spring 2b weeks	Summer 3a weeks	Summer 3b weeks
Year 10	Research Methods	Research Methods + Memory	Memory	Development	Development + Perception	Perception
Year 11	Language thought & communication	LTC + Psychological Problems	Psychological Problems + Brain and neuropsychology	Brain & neuropsychology	Revision	Revision

Rationale to include:

- Research Methods is taught first as it appears in all of the other modules
- Topics are generally 19-25 lessons long without revision and assessment. This is roughly a term. If there is a longer term and we use those lessons to conduct practical experiments which enables students to provide context to the content taught.
- Research Methods links to all topics. Some topics have interwoven abstract links e.g. nature v nurture debate.
- No links to KS2 or KS3. Lots of links to KS5. Some studies taught link to AS/A level as does Research methods, nature v nurture debate and the brain and neuropsychology module.
